

Launch of the ASAP 2.0 Protocol for coordinated response to domestic violence against women and children

9 April 2024

Working with individuals who commit domestic violence is crucial in addressing abuse.

This principle underpins the [ASAP 2.0](#) project, which aims to prevent male violence against women and children by enhancing perpetrator programmes and fostering coordinated responses. Since 2022, the ASAP 2.0 team has worked on developing a standardised methodology for the collaboration between **perpetrator programmes and victim support services**, and with critical actors in the system for risk assessment and case management.

After two years of engagement with this theme in Italy, Bulgaria, Cyprus and Greece, we are proud to unveil the ASAP 2.0 Protocol. This lays the framework for improved collaboration among professionals in perpetrator programmes and domestic violence victim support services. It provides a universally applicable and adaptable structure suitable for addressing all instances of domestic violence, accommodating each organisation and country's specific capacities and contexts. Click [here](#) to download the **ASAP 2.0 protocol, toolbox and recommendations**.

Join us for the upcoming **online event “Building a Stronger Future - Strategies and Practices to Establish Effective Coordinated Response to Address Domestic Violence” on 19 April 2024**, organised by the ASAP 2.0 team.

The project partners will share the ASAP 2.0 protocol and toolkit, which is essential for establishing a coordinated response to violence against women. The event will also bring together experts from **European best practices** showcasing different models of coordinated response applied to different targets and systems.

You can view the agenda and register for free [here](#).
